Created for 3D printer

Cockpit Set for P-47 Thunderbolt
3D Printable

ASSEMBLY INSTRUCTION

RC Model printed on 3D printer

Visit our website, www.bastlero.com, to purchase a product you are interested in. Once you've made your purchase, you will receive access to download the file in

Download the files onto an SD card. We have optimized the universal G-code output to work with a wide selection of printers and have tested our products on several printer brands and configurations. If you own a Prusa 3D printer, please use the Prusa G-code files for printing.

Print all of the model parts on your 3D printer. The minimum supported size of the printed surface should be 22x22x20 cm or 20x25x20 cm.

Assemble the model according to the attached PDF manual. For bonding the model parts, we recommend using Super Glue (medium thickness) and Activator.

PRODUCT CONTAINS

- STL files of an Cocpit set at a 1/8 scale for a Prusa 3D printer.
- G-CODE Files
- 3MF Files
- Asssembly instructions in PDF format
- Scale markings in PDF format

MODEL SPECIFICATION

scale
1:8

made of
7 pcs

Printed weight
3oz / 86g

WATEVER YOU NEED

1. PLA filament for print model parts
2. 3D Printer
3. Super glue and Activator
4. Product files
